The Solution

That's why we created Eventify/Pulse, a smart, social platform that helps you discover events tailored to your mood, interests, and budget.

You can RSVP, book instantly, see which friends are attending, and get AI-recommendations that actually understand your vibe. With QR check-ins, reminders, and invite-only events, you'll never miss out again.

People constantly **miss out on great events** because event info is scattered across apps, with no single place to discover, RSVP, and manage everything.
